FINAL REPORT VOL. I

RIZAL

CENSUS OF POPULATION AND HOUSING

NATIONAL CENSUS AND STATISTICS OFFICE MANILA, PHILIPPINES

REPUBLIC OF THE PHILIPPINES NATIONAL ECONOMIC AND DEVELOPMENT AUTHORITY

HIS EXCELLENCY
PRESIDENT FERDINAND E. MARCOS
Chairman

GERARDO P. SICAT

Director General

NATIONAL CENSUS AND STATISTICS OFFICE *

TITO A. MIJARES
Acting Executive Director & Civil Registrar-General

^{*} At the time this final provincial report went to press, Presidertial Decree No. 418 was issued (March 20, 1974) reconstituting the Bureau of the Census and Statistics into a new office under the administrative supervision of the National Economic and Development Authority.

PREFACE

Presented in this report are statistics of the population in the province as a whole, in urban and rural areas, and in municipalities and barrios, based on the data collected during the Population and Housing Census conducted on May 6, 1970. This report provides information on the number of inhabitants and their age, sex, marital status and other demographic characteristics as well as data on literacy, school attendance, migration, fertility, labor force and other social and economic information about the population.

While basic demographic information was collected for every individual in the population, sampling was utilized in the collection of household information on literacy, migration, fertility, economic activity, etc. The specific items which were covered in the sampling scheme adopted for the census are enumerated in detail in the Explanatory Text of this report.

This report is one of 67 in the series of the Final Provincial Reports on Population and Housing. The National Summary for the Philippines will follow after all the provincial reports in the present series shall have been published.

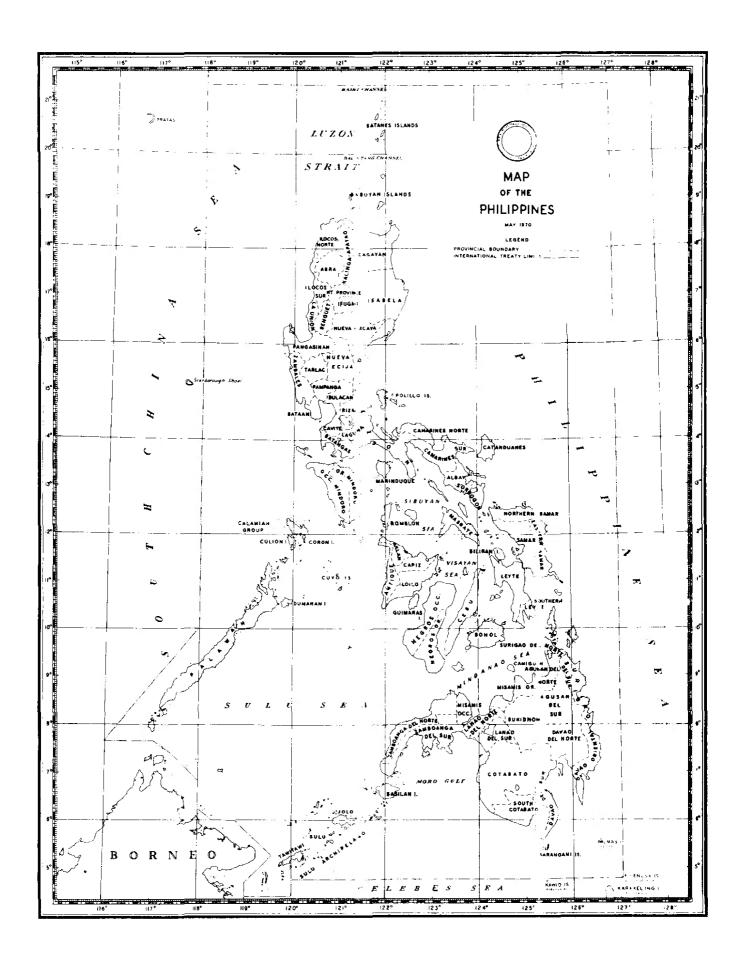

Other reports to be published are the Special Reports on: a) Population, such as data on employment status cross-classified with highest grade completed, school attendance, usual occupation or activity during the twelve months preceding May 6, 1970; the employed and unemployed by major industrial classification and major occupational classification; type of vocational or technical skill of the population 10 years of age and over; and mother tongue by literacy and highest grade completed of the population six years of age and over, and b) Housing—such as data on number of households and persons in households by type of building cross-classified by sex, age, and marital status of heads of households; by type of building cross-classified by usual occupation, activity and sex of heads of households, and by type of building cross-classified by type of activity, industry and sex of heads of households.

We are deeply thankful to His Excellency, the President of the Philippines, for authorizing the taking of the census and underscoring the need for the assistance and cooperation of all government agencies and instrumentalities in the census effort through the creation of the Presidential Census Coordinating Board composed of heads of certain Government Agencies, such as: the Office of the Executive Secretary, the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistance on Community Development (PACD), and the Presidential Economic Staff (PES), and the various bureaus and offices under them, and the Provincial and City, Municipal and Municipal District Census Boards which were chairmanned by the provincial governors, city, municipal and municipal district mayors, respectively.

Special mention is made of the assistance and cooperation of the Bureau of Public Schools which supplied the census supervisors and enumerators for the actual census taking and the Armed Forces of the Philippines which made available their communication and transportation facilities for the transmission of census messages and the transport of census torms to and from the province after the field enumeration.

Finally, we give our sincere thanks to the mass media and to the general public for their cooperation in this undertaking.

Manila, Philippines April, 1974

Part I - POPULATION

INTRODUCTION

The 1970 Census of Population, taken on May 6, 1970, was the first to be conducted by the Bureau of the Census and Statistics after the establishment of its local offices in almost all the provinces of the country. These field offices, which are staffed by two to ten regular employes, directed, supervised and controlled the field enumeration.

The figures in this report are based on the data collected through the schedules used during the population census enumeration, namely:

- PH Census Form No. 2 (Ordinary Household) which was used in 19 out of every 20 households enumerated;
- PH Census Form No. 2-A (Sample Household) which was used in 1 out of every 20 households enumerated; and
- PH Census Form No. 5-B (Institutional Census Report) which was used for those living in an institution or collective living quarters, such as jail, training camp, convent, ship, dormitory, seminary, hospital, asylum, military camp, welfare institution, etc.

Most of the items in these schedules were pre-coded to relieve the enumerators of the tedious task of memorizing or of having to constantly refer to the Enumerator's Manual for the necessary codes, reduce processing costs and time, and make possible the release of advanced data within a relatively shorter period. The latest available electronic data processing machine was also utilized to process the census data and hasten the publication of the census reports.

The total population of the Philippines on Census Day, May 6, 1970, was 36,684,486. This figure includes the household population of 36,602,532 and the institutional population of 81,954.

AUTHORITY FOR THE 1970 CENSUS

Commonwealth Act 591 authorizes the Bureau of the Census and Statistics "to prepare for and undertake all censuses of population, agriculture, industry and commerce."

Executive Order No. 149, issued by the President on October 1, 1969, originally set Sunday, February 16, 1970, as the Census Day or the date of the start of enumeration. This was later amended by Executive Order No. 211, dated February 14, 1970, resetting the Census Day to Wednesday, May 6, 1970.

ADVISORY COMMITTEE

To avail of the expert advice of organizations and individuals with technical competence and experience in specialized fields, an Advisory Committee was formed.

Represented in the Committee were the Population Institute; National Coordinating Center for the Study and Development of Filipino Children and Youth; University of the Philippines; Philippine Statistical Center; National Economic Council; Presidential Economic Staff; Department of Labor; Regional Urban Planning Office; People's Homesite and Housing Corporation; Department of Health; Department of National Defense; National Science Development Board; Commission on National Integration; Presidential Arm on Community Development; Bureau of Private Schools; Bureau of Public Schools; Budget Commission; Philippine Statistical Association; Institute of Planning and the Asian Development Bank.

PERSONNEL

A total of 79 regular bureau personnel were recruited from the various divisions to compose the Task Force that trained the Census Officers and served as resource persons during the operation. This Task Force was trained by the Chief Trainers who were ranking personnel of the bureau involved in the planning and preparatory phases of the census work.

Every province had a provincial census officer or officer-incharge who supervised the field operations, assisted by welltrained central office personnel. For the entire country, there were 2,297 public school principal teachers designated as supervisors, and 66,722 public school teachers who served as enumerators during the census enumeration. Coordinating the activities of all the field force was an Operations Unit with its staff from the Manila Office.

CENSUS BOARDS

The Presidential Census Coordinating Board (PCCB) which was created by Executive Order No. 211, was responsible for the systematic coordination of government agencies and instrumentalities involved in the census effort. The Census Director was named Executive Officer of the PCCB, with the Executive Secretary as Chairman and the Secretary of Commerce and Industry as Vice-chairman. Represented in the PCCB were the Departments of Commerce and Industry, National Defense, Education, Public Works and Communication, Agriculture and Natural Resources, Health, the Presidential Assistant on Community Development and the Presidential Economic Staff.

As counterpart of the PCCB at the local government level, there were also established Provincial, City and Municipal Census Boards which provided such assistance and facilities as were required during the field enumeration.

The Provincial Census Board was composed of the Provincial Governor as Chairman, and the Division Superintendent of Schools, Senior District Highways Engineer, PC Provincial Commander, Provincial Health Officer Provincial PACD Official and the Provincial Agriculturist as members.

The City Census Board was composed of the City Mayor as Chairman, and the City Superintendent of Schools, City Engineer and the City Health Officer, as members.

The Municipal Census Board was composed of the Municipal Mayor as Chairman and the Supervisor/Principal Teacher, Municipal Health Officer, Municipal Agriculturist and the Municipal PACD Officer, as members.

Each board had a secretariat headed by an executive officer who was the Census Officer and membership was comprised of personnel detailed from the different government agencies, instrumentalities, government-owned or controlled corporations as well as from the local governments.

ESTABLISHMENT OF ENUMERATION AREAS

For census purposes, the country was divided into 38,522 enumeration districts (ED's). An ED is a specified area, the enumeration of which can be finished by one enumerator within an allotted period of time; usually it has a population from 800 to 1,200 persons. However, as a result of the decision to undertake the census enumeration in 10 days instead of 20, as originally planned, most of these ED's were split into two or more parts, each part assigned to one enumerator.

METHOD OF ENUMERATION AND USE OF SAMPLING

The enumeration of the population was done by personal interview. Each enumerator visited the households within his ED of assignment and obtained the information called for in the population schedules. If the household was an ordinary household (non-sample), the head or any responsible member was interviewed using PH Form 2; if a sample household, the respondent was interviewed using PH Form 2A.

All households were asked items relating to the personal characteristics of every member of the household, such as relationship to head, sex, age, marital status, citizenship, mother tongue, school attendance and highest grade completed. However, for every 20th household (5 percent), additional items on literacy; ability to speak Pilipino, Spanish, or English; religion; place of residence in February 1960 and May 1965; items on the labor force, including employment, industry and occupation for persons 10 years old and over; and items on fertility for evermarried women were asked by the enumerators (see "Population Items of Data Collected").

PLACE WHERE ENUMERATED

The population were enumerated in their usual place of residence. Usual place of residence is the geographic place (barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from the place where he was found at the time of the census. As a rule, it is the place where he usually sleeps.

POST-ENUMERATION SURVEY

A Post Enumeration Survey (PES) was conducted by the Bureau from May 25 to June 5, 1970, to measure coverage and content errors in the main enumeration.

The PES was conducted independently from the main enumeration by 503 especially selected and trained teacher-enumerators under the supervision of 31 Task Force personnel from the Manila Office, who were trained by the members of the Sampling Committee which designed and planned the PES operation in coordination with key officials of the Population and Demography Divisions and the Operations Unit.

A simple two-stage sampling design was utilized. Enumeration districts and households constituted the primary and secondary sampling units, respectively. A total of 503 ED's were taken as samples and these were allocated to the 67 provinces in proportion to their 1970 projected population. However, all Mindanao provinces, except Camiguin, were allotted at least 8 ED's each, while the Visayas and Luzon provinces at least 4 ED's each.

Two general forms were used, PH-PES Form 6 (listing form) and PH-PES Form 7 (sample household schedule). In each of the selected sample ED's, an independent and complete listing of all households was made and this served as the frame for the selection of a 10 percent sample of the households. The selection of households was done by systematic sampling with a random start.

CONTENT AND COVERAGE

This provincial report is presented in four (4) parts and comprises fifty-nine (59) tables, as follows:

	No. of	Tables
Number of inhabitants		6
Economic characteristics		20
Social characteristics		19
Marital status	3	
Education and literacy	7	
Citizenship	2	
Mother tongue	_	
Ability to speak Pilipino, English		
and Spanish	2	
Religion	2	
Demographic characteristics		14
Fertility	8	
Migration	_	

Tables based on a 5 percent sample may contain figures in the distribution of a certain characteristic which do not correspond to the figures in the distribution of the same characteristic in the tables on a 100 percent basis. However, the totals in the tables based on a 5 percent sample and on 100 percent are the same.

The coverage of the population enumerated in the census and the size of the sample are shown below:

Topic	† Table † No.	Coverage	Size of sample (percent)
I. Number of Inhabitants	1-5	Household and institutional	•
	6	population Household population Institutional population	; 100 ; 5
		i popolenon	100

DEFINITION OF TERMS AND CONCEPTS

The following terms and concepts were used in the conduct of the census enumeration —

UPBAN AND RURAL AREAS

The following concepts were followed in classifying areas as urban in the 1970 Population Census:

- In their entirety, all cities and municipalities having a population density of at least 1,000 persons per square kilometer.
- Poblaciones or central districts of municipalities and cities which have a population density of at least 500 persons per square kilometer.
- III. Poblaciones or central districts (not included in I and II), regardless of the population size, which have the following:
 - a. Street pattern, i.e., network of streets in either parallel or right-angle orientation;
 - b. At least six establishments (commercial, manufacturing, recreational and/or personal services); and
 - c. At least three of the following:
 - (1) A town hall, church or chapel with religious services at least once a month;
 - (2) A public plaza, park or cemetery;
 - (3) A market place or building where trading activities are carried on at least once a week; and
 - (4) A public building like a school, hospital, puericulture and health center or library.
- IV. Barrios having at least 1,000 inhabitants which meet the conditions set forth in III above, and where the occupation of the inhabitants is predominantly non-farming/ fishing.

All areas not covered in the definition of urban places are considered rural.

In the 1960 census the following areas were considered urban:

- 1. In their entirety, all municipal jurisdictions which, whether designated as chartered cities, provincial capitals or not, have a population density of at least 1,000 persons per square kilometer. The whole of Quezon, Baguio and Cebu cities, notwithstanding the minimum density rule, are to be included.
- It. For all other cities and municipalities with a population density of at least 500 persons per square kilometer, only the poblacion (regardless of population size) is to be considered; any barrio having at least 2,500 inhabitants and any barrio contiguous to the poblacion with at least 1,000 inhabitants. For cities where the poblacion is not specified, the central district or the "city proper" (e.g., for Davao—Bucana (1) Davao Proper (2) and Molave (3) shall be regarded as the poblacion.
- III. For other cities and municipalities with a population of at least 20,000 persons, only the poblacion (regardless of population size) and all barrios having at least 2,500 inhabitants and contiguous to the poblacion.
- IV. All other poblaciones having a population of at least 2,500 persons.

USUAL PLACE OF RESIDENCE

The usual place of residence is the geographic place (street, sitio, barrio, municipality or province) where the enumerated person usually resides. This may be the same as or different from his legal residence, or the place where he was at the time of the census. As a rule, it is the place where he lives and sleeps most of the time.

HOUSEHOLD

Usually a household consists of a group of people who sleep in the same dwelling unit and have common arrangement for the preparation and consumption of food. However, a person living alone in a distinct dwelling unit is considered as one separate household. In most cases, a household consists of a related family group. In some instances, three generations may be found living together in one household. Some household members may have no relationship to the central group—boarders and servants, for example—but they are counted as part of the household if they eat and sleep or at least sleep in the same dwelling unit.

A "lodger" (who rents a room or space) is grouped with the household from whom he rents his room or space unless he has separate cooking facilities and a different entrance

In most cases, a household may be taken to be the entire group of persons who customarily sleep in one dwelling unit. An exception, however, is that of two or more distinct family groups with independent eating arrangements who share one dwelling unit only for economy or for lack of housing facilities in the district.

PERSONS NOT LIVING IN HOUSEHOLD

These include persons in military installations, correctional and penal institutions, dormitories of schools and universities, hospitals, religious institutions and the like.

HEAD OF HOUSEHOLD

The head of household is the person who generally provides the chief source of income for the household unit. He is the adult person, male or female, who is responsible for the organization and care of the household or who is regarded as such by the members of the household.

RELATIONSHIP TO HEAD OF HOUSEHOLD

This determines how each household member is related to the head. Examples of this relationship are: wife, son, daughter, son-in-law, daughter-in-law, grandchild, other relatives (niece, nephew, aunt, uncle, etc.), not related members (boarder, servant, etc.).

USUAL MEMBERS OF THE HOUSEHOLD

These are members of the household who regard the dwelling unit presently enumerated as their home or the place where they usually sleep.

SPECIAL AREAS

This is a classification of the living arrangements for a group of ten or more persons unrelated to the head of the household or the person in charge.

PERSONS COUNTED AND ENUMERATED

These include the following:

- a. Those present and alive at the time of the enumeration except those born after 12:01 A.M. of May 6, 1970;
- b. Those temporarily absent at the time of the enumeration for various reasons which include those:
 - 1. on vacation;
 - 2. on business;
 - 3. schooling below college level;
 - confined in a hospital, if confinement is not more than six months;
 - in the Armed Forces, if their absence is not more than six months;
 - 6. in jail (provincial or municipal), if their sentence does not exceed six months.
- c. Those who are temporary residents or who are not certain they will be enumerated in their usual residence;
- d. Employees and domestics who live with the household, or at least sleep in the same unit;
- Filipino employees and domestics employed by a foreign family, who will not be enumerated in their usual place or residence;
- f. Boarders or lodgers who regularly sleep in the same dwelling unit;
- g. Citizens of foreign countries who are students or who are employed, or who have a business in the Philippines and who are not living within the compound of any embassy, ministry, or legation and who expect to reside in the Philippines for a year or more. These include members of their families if they are in this country with them and who are also expected to reside in the Philippines for more than a year; and
- h. All those who are alive on May 6, 1970 (12:01 A.M.) but who subsequently died prior to the date of enumeration.

FAMILY NUCLEUS

A family nucleus is restricted to a married couple or parents and their never-married children in the same household, that is, to the conjugal family nucleus. A conjugal family nucleus consists of any of the following:

- a. a married couple without children;
- b. a married couple with one or more never-married children;
- one parent (either father or mother) with one or more never-married children.

AGE

This is the age of the person on his last birthday as of Census Day, May 6, 1970, in completed years. When the age of a person is not reported in the form, it is estimated on the basis of other available information such as marital status, school attendance, employment status and age of other members of the family.

CITIZENSHIP

A person's citizenship depends on the country to which he owes legal allegiance. If the father is a foreigner and the mother is a Filipino, infants or minor children follow the citizenship of their father.

MARITAL STATUS

This refers to the following

- a. Single denotes a person who has never been married.
- b. Married denotes a person legally married, either living together with spouse at the time of the census or temporarily separated owing to work, illness, or service in the Armed Forces or a person who lives with someone as man and wife, whether legally married or not.
- Widowed denotes a married person whose spouse died and up to the census taking has not remarried.
- d. Separated denotes a person permanently separated from the spouse, legally or otherwise, because of marital discord or some other reasons. "Separated" in this sense, does not mean separated because of husband's military service duty, hospitalization, etc., which would separate the couple from each other temporarily
- e. **Divorced** denotes a person who is granted such status through a court decree

AGE AT FIRST MARRIAGE

This refers to the age when a woman first entered married life or her first consensual union (even if she were married more than once). Marriage here may either be a legal or consensual union (where the man and woman decide to live together without benefit of clergy or civil ceremony). Age refers to the particular age when a woman first had her marriage consummated. In a consensual union, the age at first marriage refers to the date when the couple started living together.

MOTHER TONGUE

This refers to the dialect spoken in a person's home in earliest childhood. Aside from Pilipino, which is the national language, among the principal dialects spoken are: Cebuano, Tagalog, Hiligaynon (Ilongo-Visayan), Ilocano, Bicol, Samar-Leyte, Pampango and Pangasinan.

ABLE TO READ AND WRITE

A person is able to read and write when he can read and write a simple message in some language or dialect.

SCHOOL ATTENDANCE

This means attendance in schools or colleges, public or private, including night schools, which can advance a student in the regular curriculum recognized by the school system. This excludes attendance in vocational schools such as schools for dressmaking beauty culture, hair science, watch repairing, or motor-vehicle driving. It also excludes attendance in nursery schools. In general, training received by mail from correspondence schools is excluded. If, however, correspondence courses were given by a regular school, such as a university, and they are counted toward promotion in the regular school system, such schooling is included.

HIGHEST GRADE COMPLETED

This refers to the highest grade or year completed in any school, college or university.

HIGHEST DEGREE OBTAINED IN COLLEGE

This is the highest degree received after having completed a course of study at the college level of education. Information on the degree received includes the title of the highest degree, diploma or certification received, or an indication of the field of study, if the title does not make this clear.

RELIGION

A person, infant or adult, who is not yet baptized carries the religious affiliation of his brothers and sisters or, if an only child, that of his mother.

CHILDREN BORN ALIVE

These children are all live-born, whether legitimate or illegitimate, or whether born of the present or prior marriage, and regardless of whether they are living or dead at the time of the census, or living elsewhere.

CHILDREN NOW LIVING

These children born to the woman concerned (whether legitimate or illegitimate, or whether born of the present or of prior marriages) are still living at the census date, regardless of their age or where they reside.

EVER-MARRIED WOMAN

This refers to a woman who has already entered married life.

Marriage here may either be legal or consensual union.

VOCATIONAL OR TECHNICAL SKILL

The vocational or technical skill possessed by individuals is gained either through schooling, training, or experience. These persons are engaged in craft or manual operation which requires the exercise of considerable initiative, independent judgment and trade knowledge under varying work conditions. In addition, they show proficiency or technical ability in any art, science, or handicraft demonstrated by ease or expertise in performance or application.

REFERENCE WEEK

The data on the economic activities of persons 10 years old and over relate to the calendar week preceding the enumerator's visit, thus the reference week is not the same for all respondents because not all persons were enumerated during the same week. The majority of the population was enumerated during the 10-day period from May 6 to May 16, 1970.

ECONOMICALLY ACTIVE

The economically active household population includes all persons classified as employed or unemployed.

EMPLOYED

Employed persons comprise all population of households 10 years old and over who, during the preceding week of enumeration, were either

- (a) working for pay or for profit or without pay in the family farm or enterprise, or
- (b) not working but had a job or business from which they were absent.

UNEMPLOYED

Persons in the household 10 years old and over are classified as unemployed if they were not at work during the reference week but were wanting and looking for work or would have been looking for work except that:

- (a) they were temporarily ill, or
- (b) they believed no work was available.

NOT ECONOMICALLY ACTIVE

Persons living in households and considered not economically active are those 10 years old and over who are not classified as employed or unemployed. Persons not economically active are further classified in this report into the following categories:

1) housekeeper, (2) student, (3) others.

HOUSEKEEPER

A housekeeper is a person who does housekeeping chares in one's house such as cooking, cleaning the house, and laundering for family members of the household. This does not include work around the house as painting one's house, fencing the home lot, cutting the lawn, etc. Persons doing this type of work are reported under "Others."

STUDENT

A student is a person enrolled in a school or college and is not considered economically active during the week prior to his enumeration. A working student is classified as "economically active" rather than "student" even though he spends more time in school than in his work.

OTHERS

"Others" may include persons doing any of the following activities:

- a. Retired or do not want to work
- b. Unable to work (because of physical disability or ill-health)
- c. Persons working without pay but not on family farm or enterprise, volunteer workers or persons doing such work as painting the house, fencing the yard, etc. in their own homes.

CLASS OF WORKER

- (1) The allocation of a person to a particular class of worker category is basically independent of the occupation or industry in which he works.
- (2) The class of worker information refers to the same job described in the occupation and industry columns. The classification by class of worker consists of the following categories:
 - T. Wage and salary worker
 - (a) Private employee—working for a private employer for wage, salary, commission, tips, etc.
 - (b) Government employee—working for government or government owned or controlled corporations.

2. Own business

- (a) Self-employed—working in one's business, farm, profession or trade for profit or fee, without paid employees.
- (b) Employer—working in one's business, farm, profession or trade for profit or fee, with one or more paid employees.
- (c) Unpaid family worker—working without pay on family farm or enterprise.

EXPERIENCED WORKER

A person who has worked or has been employed for two consecutive weeks, with or without a formal training, is an experienced worker.

OCCUPATION

Occupation refers to the kind of work done during the reference week by person employed or the last work done by the unemployed but experienced worker, irrespective of the class of worker or industry in which the person is classified. Persons looking for work for the first time do not have any occupation and are therefore classified under a separate category.

USUAL OCCUPATION

This refers to the specific job or occupation performed by the person in the establishment, office, farm, etc., as farmer, typist,

stenographer, lawyer, physician, etc. This is the work a person has undertaken for the last twelve months before the census taking. Occupation here includes such usual activities as house-keeping in one's own house or studying and such status as disabled and retired.

INDUSTRY

Industry refers to the activity of the establishment in which an economically active person worked during the reference week, or in the case of an unemployed but previously employed, to the activity of the establishment where he worked last. Therefore, persons looking for work for the first time do not have any industry and are separately classified.

Part II - HOUSING

INTRODUCTION

The Census of Housing was taken simultaneously with the Census of Population on May 6, 1970. The housing census is the principal means of collecting basic housing statistics aimed at providing comprehensive source of statistical information for development planning, for the formulation of housing policies and programmes, as frame for sample housing surveys and supplementary inquiries and for private researchers and commercial users.

The Census of Housing is also intended to get characteristics of structures in which people live, i.e., all "dwelling units" in the country. All structures, including those under construction (ready for occupancy on May 6, 1970) and other places of residence were given a building serial number. The housing items (H1 to H15) were filled in only for all buildings/dwelling units in which people resided on May 6, 1970, regardless of whether they were residential or non-residential.

HOUSING ITEMS

The housing items are the same for both PH Census Form No 2 (Ordinary household) and PH Census Form No. 2-A (Sample household).

The items asked are the following:

tem No.	A. Characteristics of building
1	Type of building or house
2	Number of dwelling units in building or house: occupied-unoccupied
3	Construction material of roof
4	Construction material of wall
5	Year building was built
_	B. Characteristics of dwelling unit
6	Number of rooms
7	Number of households and persons occupying
	dwelling unit
8	Type of tenure
	C. Household conveniences
9	Ownership of radio
10	Ownership of television set
11	Ownership of refrigerator
· •	•

In accomplishing the housing schedule, Items 1 to 5 were asked of the first household to be enumerated in the building. Items 6 to 8 were asked of the respondent in any household in the dwelling unit, and Items 9 to 15 were asked of each household respondent in the dwelling unit.

Type of cooking fuel

Source of drinking water

Type of toilet facilities

Type of lighting

12

13

14

15

DEFINITION OF TERMS AND CONCEPTS

BUILDING

A building is any independent free-standing structure comprising one or more rooms or other spaces, covered by a roof and enclosed within external walls or dividing walls which extend from the foundation to the roof. It usually contains one or more rooms internally connected with one another, having a common entrance and a common exit.

DWELLING UNIT

A dwelling unit is a separate and independent place of abode intended for habitation, or one not intended for habitation but occupied as living quarters by a household at the time of the census. In most places in the country a dwelling unit is a house. It may be an apartment, a group of rooms or just one room, a barong-barong, boat or cave.

The types of buildings are:

- Single house—a complete structure intended for a single family or household.
- Duplex— a structure intended for two households, with complete living facilities for each. It is a single structure divided into two dwelling units by a wall extending from the floor to the ceiling.
- 3. Apartment or accesorio—a structure usually of several stories, made up of independent living quarters, with independent entrance from internal halls or courts. An accesoria is one or two-floor structure divided into several dwelling units, each dwelling unit having its own separate entrance from outside.
- Barong-Barong—a shack or makeshift shelter, usually built with light materials.
- Commercial—a building used for trade and commerce such as a store or an office building.
- Industrial—a building used for processing or manufacturing, such as a tacrory plant.
- 7. Agricultural—any structure used for agriculture purposes, such as barn, warenouse, etc.
- 8. Institutional—a hospital, school, church, etc.
- Others—any structure which does not fall into any of the above classification.

NUMBER OF DWELLING UNITS IN THE BUILDING

This includes all dwelling units that are "occupied" and those that are "unoccupied". In cases of residential compounds or privateresidences having one or more cuxiliary buildings (in adition to the principal building) and which are used as living quarters by some members of the household, said auxiliary buildings

 $\alpha_{}^{\dagger}e$ treated as annexes of the principal building, and as such all the buildings in the compound are considered as one dwelling unit.

CONSTRUCTION MATERIAL OF ROOF

The kinds of materials used in the construction of the roof are:

- 1. Galvanized iron, including aluminum and fiberglass
- 2. Asbestos
- 3. Concrete, tile
- 4. Cogon
- 5. Nipa, anahaw, buri
- Others (canvas, salvaged moterials, billboards)

CONSTRUCTION MATERIAL OF WALL

The kinds of materials used in the construction of the wall are:

- 1. Concrete, including hollow blocks, adobe stone, bricks, etc.
- 2. Galvanized iron, including aluminum
- 3. Wood, including plywood
- 4. Bamboo, including sawali
- 5. Nipa, anahaw, buri
- 6. Others (Salvaged materials like cartons, billboards, canvas, etc.)

If the roof and walls are constructed of two or more materials, the predominant material is reported.

YEAR BUILDING WAS BUILT

This refers to the period when the extent of construction permitted occupancy for living purposes and not when begun. The year reported is the particular year when occupancy started or when the building was ready for occupancy even if not occupied.

NUMBER OF ROOMS IN THE DWELLING UNIT

This pertains to the total number of rooms in a dwelling unit. This includes the bedroom, dining room, living room, kitchen and other separate spaces used or intended for dwelling purposes. Passageways, verandas, lobbies, bathrooms and toilets are not counted as rooms.

NUMBER OF OCCUPANTS

This pertains to the total number of occupants or persons whose usual place of residence is with this dwelling unit.

The dwelling unit may contain more than one household, in which case the number of occupants includes all the members of the different households whose usual place of residence is this dwelling unit.

TYPE OF TENURE

The type of tenure may be any of the following:

- Owner occupied only. A dwelling unit is "owner occupied only" if the owner is one of the persons living in the unit even if he is temporarily absent.
- 2. Owned and a part rented out. A dwelling unit a part of which is occupied by the owner and a part rented by another, i.e., if there is a lodger.
- 3. Owned and part occupied free by others. A dwelling unit may be owned by one of those living in the unit even if he is temporarily absent. In addition, a part of that dwelling unit may be occupied free by another household, family, relative, lodger, etc.
- 4. Rented only. A unit is "rented" if rent is paid or contracted for by the occupants, in cash or in kind.
- Rented and part occupied free by others. "Rented and part occupied free by others" is when one household rents a dwelling unit and then allows another household to occupy a portion of the same unit without paying any rental.
- 6. Rented and part rented out. The term applies to the occupancy of dwelling unit that is being rented by one household, but a portion of which is being sub-leased, or rented out by said household to another household, lodger, etc.
- Occupied rent-free. A dwelling unit which is occupied by a household other than the owner's and for which no rent either in cash or in kind is paid.
- 8. Occupied rent-free and part rented out. This type of occupancy has the same concept as in the preceding item except that a part of the dwelling unit is being rented out to another household or party for a certain amount.

OWNERSHIP OF RADIO

This includes all sets, whether console, table or portable and whether individual unit or combined with television, phonograph, clock, etc. which are in working condition or are being repaired. Excluded are automobile radios, sending-receiving sets ("ham radio" sets), and radios which are not in working order.

OWNERSHIP OF TELEVISION SET

Only television sets in working condition are included.

OWNERSHIP OF REFRIGERATOR

Only refrigerators that are in working order and run by electricity or any kind of fuel are included. Refrigerators which are in working order but cannot be utilized because of lack of power in the locality are excluded.

KIND OF COOKING FUEL

The kinds of cooking fuel are:

- 1. Electricity—from whatever source of power unit
- 2. Kerosene (gaas)—liquid form
- Gas (liquefied petroleum)—piped or in cylinder (Esso Gasul, Rockgas, Shellane, Manila Gas, etc.)
- 4. Wood, including sawdust
- 5. Charcoal
- Others—any kind of fuel other than those mentioned above.

TYPE OF LIGHTING

The types of lighting are:

- 1. Electricity—from whatever source of power unit
- 2. Kerosene (gaas)—whatever the nature of lamp used
- 3. Oil—any kind of vegetable (animal) oil other than kerosene
- Others—any kind of fuel other than electricity, kerosene or oil, i.e., candle wax

TYPE OF WATER SUPPLY

The source of drinking water of the household may be any of the following:

- 1. Piped water system (Municipal, NAWASA)
- 2. Artesian well
- 3. Pump
- 4. Open weli
- 5. Spring
- 6. Rain water
- 7. Lake, river, stream, etc.

TYPE OF TOILET FACILITIES

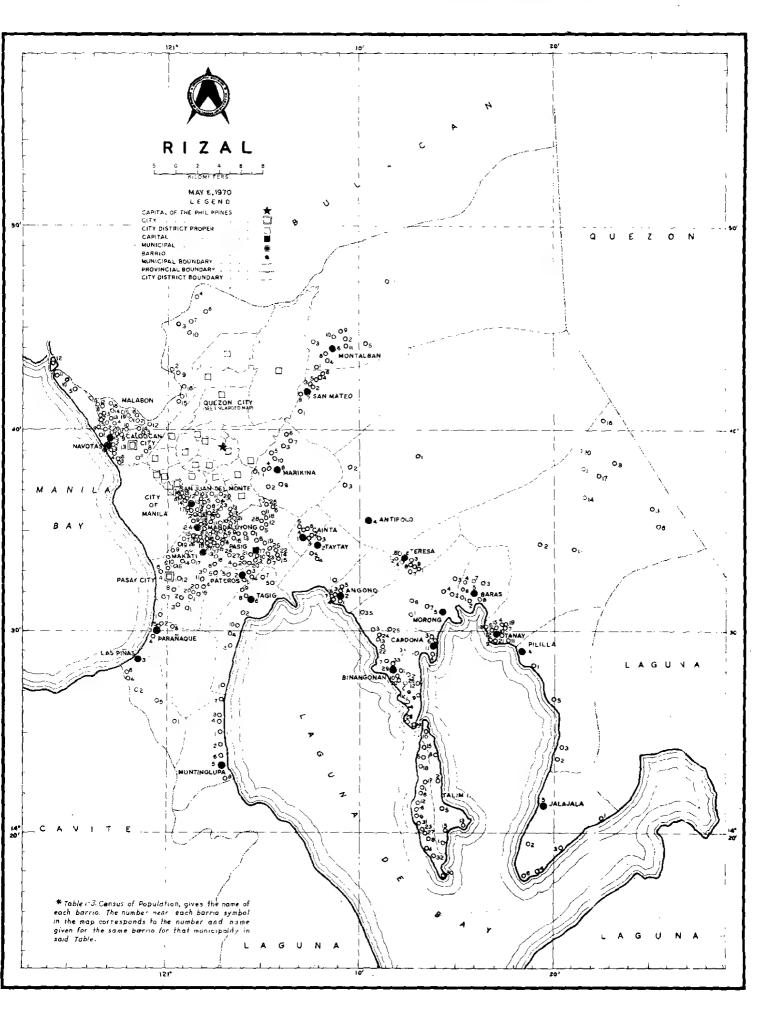

The different types of toilet facilities commonly used in buildings and houses throughout the country are the following:

 Flush system/water-sealed—Water-sealed toilet is that type where after water is flushed or poured into the bowl a small amount is left in the bowl which seals its bottom from the pipe leading to the depository. In effect, the flush toilet is one type of water-sealed toilet.

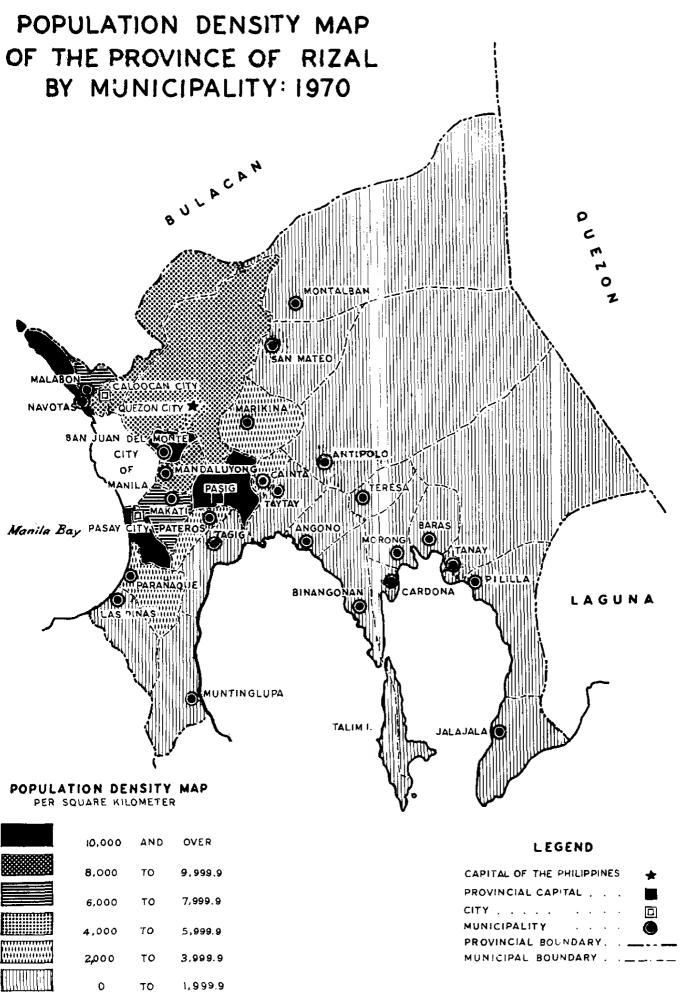

Another type of water-sealed toilet is the cement bowl with a structure quite similar to an enamel bowl. It is connected to a septic tank or concrete depository or sometimes drum or closed pit.

The other kind of cement bowl is constructed much lower than the above-mentioned type to conform to certain Filipino toilet habits.

- Antipolo system or closed pit—is a type of toilet wherein water is not used. It is a closed pit or a drum with a small opening on floor revel or with a box-like structure which is elevated from the floor.
- Open pit system—is a pit which is entirely open or partly, covered.
- 4. Public toilet—is any type of toilet for communal use.

RIZAL

INTRODUCTION

The province of Rizal was officially created by the Philippine Commission on June 11, 1901, out of several towns belonging to the former province of Manila and the military district of Morong. Situated in the southwestern portion of Luzon, Rizal is bounded by Quezon on the east, Manila Bay on the west, Laguna Bay and Cavite on the south, and Bulacan on the north. It is about 70 kilometers from east to west and 84 kilometers from north to south.

The provincial terrain is mostly low and flat on the western part, with gently rolling hills and a few rugged ridges on the eastern part. At the foot of these elevations are valleys, the largest of which is Marikina Valley, which extends from Pasig to Montalban. The Pasig and the Marikina Rivers, both emptying into Manila Bay, respectively drain Laguna Bay and Marikina Valley. The chief sources of Manila's water supply—the Montalban Dam and the Novaliches Dam—are both located in Rizal.

Rizal is not only the most industrially advanced among the provinces in the country, but one of the most prosperous as well. Shoemaking, of which Marikina is the Philippine center, is one of its largest industries, not to mention basic metal production, pharmaceutical and chemical manufacturing, food processing, textile, wearing apparel, and make-up goods. Business transactions are so vast that all sectors of the Philippine economy are affected.

The province consists of 26 municipalities and 3 cities,

with Pasig as the capital.

LAND AREA AND POPULATION

The land area of the province is 1,859.6 square kilometers, representing 0.6 percent of the total Philippine area. Rizal is the most populous among the provinces, ranking first in point of population with a population count of 2,844,689,99.2 percent of which are native born (Table 1-6). There are more females than males in the province. For every 100 females, there are only 95 males. Next to Manila, Rizal is the most densely populated, with a density of 1,529.7 persons per square kilometer. In 1960 it had a density of 783.2, or an increase of 746.5 persons per square kilometer over a ten-year period.

While the population of the country increased by 35.4 percent from 1960 to 1970, that of the province increased by 95.3 percent. During the same period the population of the Philippines grew annually at the rate of 3.01 percent while that of Rizal grew at the rate of 6.77 percent, ranking 2nd to Bukidnon in the rate of population growth between 1960

and 1970.

URBAN-RURAL RESIDENCE

Urbanization has greatly affected the population, 94.9 percent of which reside in urban areas and merely 5.1 percent, in rural areas. In comparison, the entire country is only 31.8 percent urban. The sex structure of the urban population is predominantly female, although in the rural areas the males slightly outnumber the females. Of the urban population, 51.2 percent are females and 48.8 percent are males, while of the rural population, 50.4 percent are males and 49.6 percent, females (Table 1-4).

HOUSEHOLDS AND CONJUGAL **FAMILY NUCLEI**

A total of 456,688 households and 487,475 conjugal family nuclei are reported for the province. On the average, 6.2 persons comprise each household and 5.8 persons, each family nucleus (Table 1-3).

AGE COMPOSITION

Rizal has an older population than the Philippines. It has a lower proportion of the youth population (0-14 years) and the older age group (65 and over) than the country, which is offset by a higher proportion in the working or productive ages (15-64). The Philippines has 43.1 percent of its population in age group 0-14, 53.4 percent in age group 15-64, and 3.5 percent in age group 65 and over, while the province has 40.8 percent, 57.2 percent, and 2.0 percent in the corresponding age brackets. The median age of the population is 17.7 years, which is slightly older by 0.3 year than the median age for the entire country (17.4).

The rural areas have a younger population than the urban areas. Of the urban population 40.5 percent are found in the age group 0.14, compared to 45.9 percent of the rural population. Correspondingly, a much higher percentage of the urban (57.6%) than the rural population (51.7%) belong to the working ages. However, the rural areas, with 2.4 percent, have a slightly higher proportion of the older age group than the urban areas, with 1.9 percent (Table 14).

The dependency ratio of the province is very much lower than that of the Philippines. For every 100 persons in the productive ages, there are 75 "dependents" in Rizal. Comparatively, there are more "dependents" in the rural (94) than in the urban areas (74). The dependency ratio in the rural areas is even higher than that for the whole Philippines, which is 87.

ECONOMICALLY ACTIVE POPULATION

Over 2 million persons (2,013,629) comprise the population 10 years old and over, 48.6 percent of which are economically active and 51.4 percent, not economically active. Among the economically active, 93.8 percent are employed and 6.2 percent are unemployed. Fifty-six percent of the unemployed are seeking work for the first time. Housekeepers comprise 47.1 percent of those considered not economically active; students, 16.7 percent; and "others", 35.2 percent (Table II-1).

CLASS OF WORKER

Eighty-two percent of the 945,011 experienced workers in Rizal are wage and salary workers. Fifteen percent are in their own business, while 2.9 percent are unpaid family workers. Majority of the wage and salary workers are private employees. (83.4%), with the government employees comprising only 16.6 percent (Table 11-3).

INDUSTRY

Being highly urbanized and industrialized, Rizal has an economy which is no longer agricultural, but widely diversified.

More workers are engaged in government, community, business, recreational, and personal services than in any Of the total experienced workers, 38.6 other industry. percent are in services, followed by 23.7 percent in manufacturing; 12.7 percent in commerce; 9.3 percent in transport and communication; and 7.1 percent in construction. Only 5.0 percent are in agriculture, hunting, forestry and fishing, while 2.3 percent are in industries not adequately described (Table 11-6).

The males are more active than the females in agriculture, comprising 91.4 percent of those engaged in agricultural activities, in sharp contrast to the females who comprise only 8.6 percent. Of the total economically active male population, however, merely 7.1 percent are in agriculture. Similarly, only 1.1 percent of the total economically active female population are working in the same industrial sector (Table 11-1).

OCCUPATION

Classified according to occupation, one-fourth (24.9%) of the total experienced workers are craftsmen, production process workers and laborers. About 17.8 percent are service workers: 12.1 percent, professional, technical and related workers; 11.3 percent, clerical workers; 9.7 percent, sales workers; 9.4 percent, workers in transport and communication; 4.9 percent, farmers, fishermen, hunters and loggers; 3.8 percent, stevedores and related freight handlers; and 3.2 percent, administrative, managerial, and executive workers. Put together, miners and quarrymen and workers whose occupations are not stated or identifiable comprise 2.9 percent (Table II-12).

NUMBER OF HOURS WORKED

Three-fifths (60.7%) of those who were working during the reference period worked for 45 hours and over, while 30.5 percent worked for 35 to 44 hours. A small percentage worked for 25 to 34 hours (3.4%), for 15 to 24 hours (4.1%), and for less than 15 hours (1.2%) (Table 11-15).

USUAL OCCUPATION

By usual occupation for the last twelve months, craftsmen, production process workers and laborers comprised 24.4 percent; service workers, 17.9 percent; professional, technical and related workers, 12.6 percent; clerical workers, 10.8 percent; workers in transport and communication, 9.4 percent; sales workers, 9.1 percent; farmers, fishermen, hunters and loggers, 4.9 percent; stevedores and related freight handlers, 4.0 percent; and administrative, managerial and executive workers, 3.0 percent. The rest were miners and quarrymen, members of the Armed Forces, and workers whose occupations were not specified or identifiable (Table II-19).

MARITAL STATUS

A higher percentage of the population aged 10 and over are never married than married. Of the 2,021,291 persons belonging to this age bracket, 51.1 percent are unmarried, 45.1 percent are married, 3.3 percent are widowed, and 0.4 percent, divorced or separated. The proportion of never married person is greater not only among the males, but also among the females. Among the males 10 years old and over, 51.3 percent are single and 47.0 percent are married, while among the females 50.9 percent are unmarried and 43.3 percent, married. However, more females (5.1%) than males (1.4%) are found in the widowed category (Table III-1).

LITERACY AND EDUCATION

The level of literacy in Rizal is very high, with nine-tenths, or 89.9 percent of the population 6 years old and over "able to read and write", or are literate. In the rural areas, however, the literacy rate is slightly lower (81.5%) compared to that for the Philippines which is 83.4 percent, while that in the urban areas is 90.4 percent (Table III-4).

Two-fifths (39.5%) of the population 25 years old and over have completed elementary education; 28.1 percent have finished high school and 26.3 percent, college, while 5.6 percent have not completed any grade at all (Table III-6).

Out of 2,331,166 persons 6 years old and over 31.9 percent are attending school. However, in the 6-24 year age group, more than half, or 55.1 percent of the population are in school. Of those attending school in the same age bracket, 50.7 percent are males and 49.3 percent, females (Table [11-9]).

HOLDERS OF COLLEGE DEGREE

Thirty-seven percent of the 243,651 professionals reported for the province hold a degree in the Social Sciences. About 23.2 percent are in the teaching profession; 11.1 percent, in Engineering; 10.2 percent in the Medical Sciences; 5.9 percent, in Law; and 4.3 percent, in the Humanities. Holders of a degree in Fine Arts comprise only 2.2 percent; in the Natural Sciences, 1.0 percent; in Agriculture, another 1.0 percent; and those in unspecified fields of study, 4.1 percent (Table III-10).

DIALECT

Tagalog, the principal dialect in Rizal, is spoken by 2,244,762 persons, or 78.9 percent of the population. A small percentage speak Iloco (4.5%), Bicol (3.5%), Samar-Leyte (3.3%), Hiligaynon (2.3%) Cebuano (2.1%), Pangasinan (1.6%), and Pampango (1.6%), while the rest speak one of several other dialects being spoken in the province (Table III-13).

A great majority (96.1%) of the populace can speak Pilipino, while 61.4 percent are able to speak English and 7.6 percent, Spanish (Table 111-16).

RELIGION

The predominant religion s Roman Catholicism, with 2,663,117 followers, or 93.6 percent of the population. Protestantism has a following of 2.1 percent; Iglesia ni Cristo, 1.8 percent; Aglipayan 1.6 percent; "Others", 0.6 percent; and Buddhism, 0.2 percent (Table III-19).

FERTILITY

An average of 4.6 children are born alive to ever-married women in the province who have reached the end of their child-bearing period (50 years and over). While the average number is likewise 4.6 in the urban areas, it is slightly higher in the rural areas (5.3).

Out of 115,871 ever-married women 50 years old and over, 8.6 percent have never borne children by the end of their reproductive period. The proportion is slightly lower

in the urban areas, with 8.5 percent, than in the rural areas, with 8.9 percent (Table IV-I).

Ever-married women in Rizal who have already borne at least one child, bear an average of 3.7 children. The average number is slightly lower in the urban areas, with 3.6, than in the rural areas, with 4.4.

Less than half, or 47.8 percent of the 587,710 ever-married women were married by the age of 20, while 82.9 percent were married by the age of 25 (Table IV-7).

MIGRATION

Of the total population 49.8 percent were born in the same municipality where they are presently residing; 4.1 percent reside in a municipality other than the municipality of birth, but in the same province; and 45.4 percent were born in other provinces (Table IV-9).

Among the population 10 years old and over 62.4 percent are residents of the same municipality where they were residing in 1960. Five percent were then living in other municipalities within the province of Rizal, while 31.3 percent were residing in other provinces (Table IV-11).

RIZAL—HOUSING

NUMBER OF DWELLING UNITS

The province of Rizal has 443,760 dwelling units. Of this number 434,529, or 97.9 percent, are occupied and 9,231, or 2.1 percent, are unoccupied. Most of the dwelling units are single houses (68.4%); 17.2 percent are apartments/accesorias and 11.3 percent, duplex structures. "Barong-barong" or makeshift shelters comprise 1.9 percent; commercial buildings, 1.1 percent; and industrial buildings, merely 0.1 percent (Table 1).

Most of the dwelling units are found in the urban areas (94.8%), with only 5.2 percent in the rural areas. In both places dwelling units of the single type predominate, although the proportion is greater in the rural (93.7%) than in the urban areas (67.0%). However, more duplex structures (11.7%) and apartments/accesorias (18.1%) are found in the latter than in the former areas, where the same types put together comprise only 4.5 percent.

TYPE OF CONSTRUCTION MATERIAL OF ROOF AND WALL

Of the total number of dwelling units 423,989, or 95.5 percent, are constructed with roof made of strong materials (aluminum, galvanized iron, asbestos, tile or concrete) and 17,452, or 4.0 percent, of light materials such as nipa or cogon (Table 2). Of the strong materials, aluminum and galvanized iron are the most frequently used, accounting for 91.7 percent.

A great majority of the urban as well as the rural dwelling units are found in structures with roof of strong materials. Of the 420,804 dwelling units in the urban areas, 95.8 percent are built with roof of strong materials and 3.6 percent, of light ones, while the corresponding figures for the rural areas are 89.4 percent and 10.3 percent of the 22,956 dwelling units.

By type of construction material of the wall, strong materials (97.1%) are likewise more frequently used than light ones (2.5%). The same pattern holds true not only in the urban but also in the rural areas, where 97.9 percent and 82.5 percent of the respective dwelling units are found in structures with walls of strong materials. Seventeen percent of the rural dwelling units have walls of light materials in contrast to only 1.7 percent of the urban dwelling units.

TYPE OF TENURE

More than half (54.8%) of the occupied dwelling units are owner-occupied (including owned and a part rented out, and owned and a part occupied free by others), while 40.4 percent are rented only, rented and part occupied free by others, and rented and a part rented out. A small percentage (4.7%) are occupied rent-free (Table 3).

A greater proportion of owner-occupied dwelling units are found in the rural (89.6%) than in the urban areas (52.7%). Correspondingly, rented dwelling units comprise 42.4 percent in the urban and only 6.0 percent in the rural areas. Of the occupied rent-free, 4.8 percent are located in the urban and 4.4 percent, in the rural areas.

YEAR OF CONSTRUCTION

Two-fifths (39.7%) of the structures where dwelling units are found were built during 1965-1970; 38.4 percent, during 1955-1964; and 17.3 percent, during 1945-1954. Only 1.3 percent were constructed during 1942-1944 and 3.3 percent, before World War II (Table 4).

NUMBER OF HOUSEHOLDS IN EACH DWELLING UNIT

Majority of the dwelling units (91.2%) in the province are each occupied by one household. One dwelling unit containing two households comprise 6.6 percent; three households, 1.5 percent; four households, 0.5 percent; five households, an insignificant 0.1 percent; and six or more, another 0.1 percent (Table 5).

Ninety-one percent of the urban and 95.4 percent of the rural households are each contained in one dwelling unit. Two households occupying one dwelling unit comprise 6.8 percent in the urban and 3.8 percent in the rural areas. Very few consist of three households per dwelling unit, with 1.5 percent for the former and 0.6 percent for the latter.

NUMBER OF ROOMS

According to the number of rooms, 26.8 percent of the dwelling units have only one room; 29.9 percent, 2 rooms; 19.0 percent, 3 rooms; and 12.3 percent, 4 rooms. A small number have 5 (5.7%), 6 (3.0%), 7 (1.5%), and 8 or more rooms (1.8%) (Table 7).

OWNERSHIP OF RADIO, TELEVISION SET AND REFRIGERATOR

Of the 456,688 households in Rizal, 70.5 percent have radios, 33.3 percent have television sets, and 28.1 percent, refrigerators (Table 9).

More households in the urban than in the rural areas are equipped with these conveniences. Seventy-one percent of the 433,266 urban households are with radios; 34.7 percent are with television sets; and 29.4 percent, with refrigerators. Among the 23,422 rural households, 62.1 percent own radios; 7.8 percent, television sets; and 5.2 percent, refrigerators.

LIGHTING FACILITIES

Over four-fifths, or 88.9 percent, of the households use electricity for lighting. One-tenth, or 10.9 percent use kerosene, while a negligible percentage use "others" (0.1%) and oil (0.1%). Electricity is used by 91.2 percent of the urban households, compared to 46.4 percent of the rural households. In the rural areas more than half, or 52.8 percent, use kerosene, as compared to 8.6 percent in the urban areas (Table 11).

WATER SUPPLY

Piped water, the main source of water supply in the province, is used by 68.6 percent; pump, by 19.5 percent; and artesian well, by 11.0 percent. A small number use the open well (0.5%), spring (0.3%), and lake, river or stream (0.1%).

Among the urban households 71.6 percent use piped water; 17.9 percent, pumps; and 9.9 percent, artesian well. The open well and spring are seldom used, with only 0.5 percent and 0.1 percent, respectively. On the other hand, the pump is more commonly used among the rural households, with 48.2 percent, followed by the artesian well, with 30.2 percent. About 14.2 percent use piped water; 3.8 percent, spring; and 2.4 percent, the open well (Table 13).

COOKING FUEL

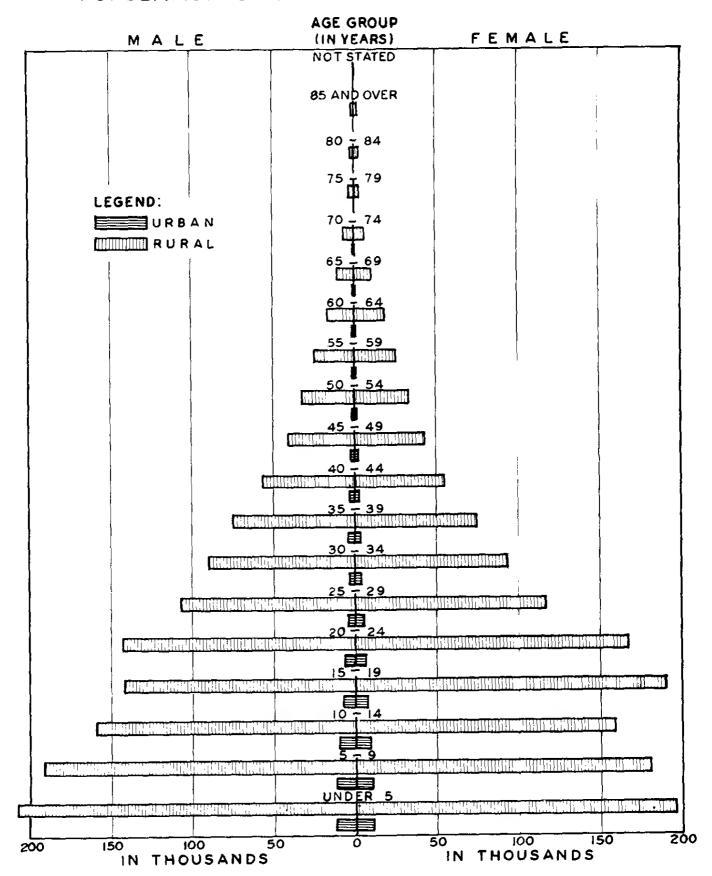

Of the total number of households in the province, 42.7 percent use kerosene as cooking fuel; 22.1 percent use gas (liquefied petroleum); 19.3 percent, electricity; and 15.5 percent, wood. A few use charcoal (0.3%) and "others" (0.1%) (Table 14).

In the urban areas 43.9 percent use kerosene, compared to 21.6 percent in the rural areas. Wood is mainly used in the rural areas. Nearly two-thirds, or 65.3 percent, use this type, in contrast to 12.8 percent in the urban areas. Next to kerosene, urban households prefer gas or liquefied petroleum (22.7%) and electricity (20.2%). Among their rural counterparts, only 10.6 percent use gas and 1.9 percent, electricity.

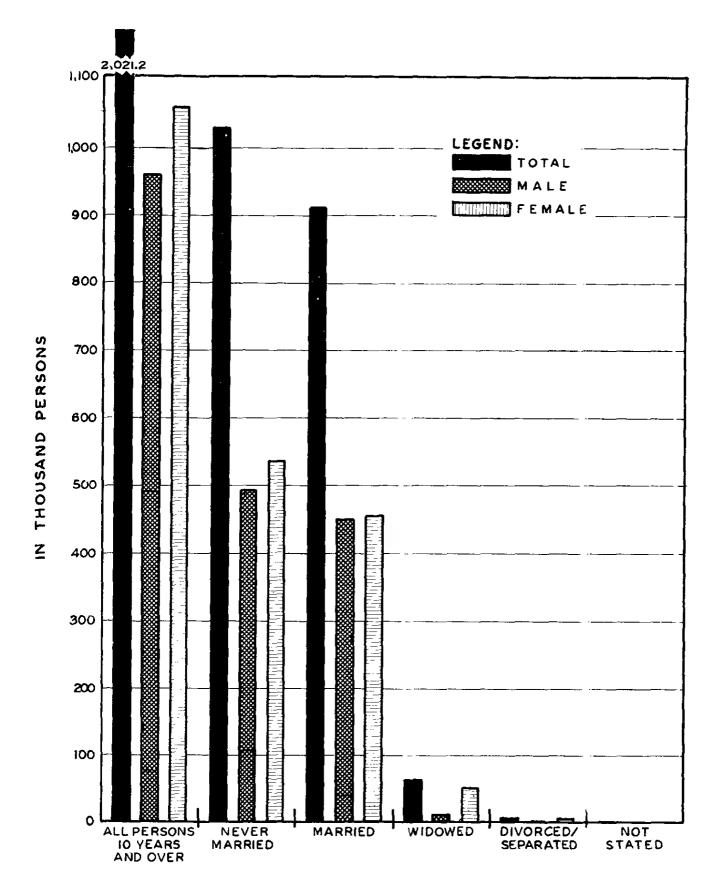

TOILET FACILITIES

More than two-thirds (68.5%) of the households in the province use the flush or water-sealed type; 11.0 percent use the antipolo or closed pit; 6.0 percent, the open pit; and 2.1 percent, the public toilets. Households without toilet facilities constitute 12.4 percent (Table 15). In the urban areas 70.6 percent use the flush or water-sealed type; 11.2 percent, the antipolo or closed pit; 5.4 percent, the open pit; and 2.1 percent, the public toilets. In comparison, the flush or water-sealed type is used by 30.1 percent in the rural areas; the open pit, by 17.0 percent; the antipolo or closed pit, by 8.5 percent; and the public toilets, by 0.9 percent. A greater proportion of households in the rural [43.5%) than in the urban areas (10.7%) lack toilet facilities.
